

# AI SURGERY PRO

PIEZO SURGERY LED MOTOR

DENTAL GROUP

Piezo surgery is a new system required for modern surgery and implant surgery, which can set up various operation modes and working tips to make the operation process smoother and improve the accuracy and efficiency of treatment

## AI Surgery PRO

Piezo bone surgery unit

01

### Various Operation Modes

Set up various operation modes and working tips to make the operation process smoother

02

### HD Sensitive touch screen

360° color LCD Full-touch non reflective screen, Sensitive touch screen

03

### Ultra silence

Selected Peristaltic pump, 5-rotor stepper motor design, easily installation, running silently, offering steady water flow

## HD SENSITIVE TOUCH SCREEN

360 degree  
Clear direct-viewing

7 inch  
Easily operate

AI ALGORITHM

High intensity focused ultrasonic only has a destructive effect on bone tissue with a specific hardness, with no damage on blood vessels and nerve tissue.  
Radial amplitude : 20-200µm  
Horizontal amplitude < 30 µm

CLEAR SURGICAL VISION

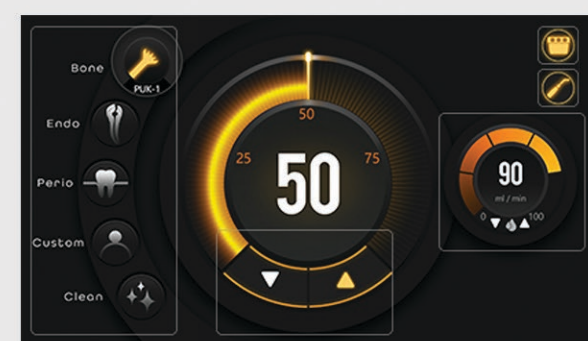

After working at full power for 10 minutes, the handpiece temperature is up to 33°C

SAFE AND RELIABLE

the surgical field of vision is clear and the shadows are reduced for better visibility

BONE MODE

ENDO MODE

CUSTOM MODE

CLEAN MODE

Operator Interface

## ► PERISTALTIC PUMP

HIGH QUALITY STEPPER MOTOR

### 45dB

Ultra silence

Running silently (less than 45dB), easy to operate and setting

### 3"

Easily installation

Quickly change hoses with a single twist and close tightly without gaps : it only takes you 3 seconds

### 5 rotors

HQ stepper motor

The 5-rotors stepper motor allows precise control of the rotation angle, delivers flow stability and metering accuracy

## FOOT PEDAL

- Water increase
- Bluetooth pairing
- Water decrease

The multi-functional foot pedal can easily control and switch the water Flow, Program, Rotation direction, Power and intelligently control the speed.

It can Support cable connection & Bluetooth wireless connection, the signals received within 10 meters

4 hours charging time, and more than 50 hours standby state

### Technical Parameter

- |  |                                |
|--|--------------------------------|
| Water Flow: 60~100ml/min                 | Working Frequency: 24kHz-36kHz |
| Water Applied Parts: Handpiece and Piezo | Max. Power Consumption: 150VA  |
| Waterproof Level: IPX1                   | Voltage: AC 100~240V           |

### ACCESS IMPLANTS

The Access implant system is manufactured in Germany and is integrated with the latest digital technologies (Exocad, 3Shape, Realguide, etc.)

Espace 14 it's also...

Biomaterials

Implants motors

Instrumentations

Hyaluron

G.B.R

Co2 / Diode lasers

### TRAINING

Espace 14 has established a partnership with KCF Paris, a leading provider of dental education.

International Master's programs, tailored clinical coaching, short courses lasting 1 to 3 days on various topics (with or without official accreditation in France), and one-week clinical coaching programs in international clinics...

KCF offers training in oral implantology and dental innovation, tailored to the needs of professionals, with programs designed to help you deepen your skills and stay up to date with the latest techniques.
